

BLU

Hi-Fi Bluetooth Speaker

 COMO AUDIO

Como Audio Blu

Como Audio's legacy products connect to Wi-Fi and handle a multitude of music sources. If you're just in need of a good quality Bluetooth Speaker, Como Audio's Blu is for you.

In addition to wirelessly streaming from your Bluetooth-equipped smart phone, computer, or MP3 player, Blu also features a clock display with alarm and snooze, an automatic backlight adjustment, a rear bass port that doubles as a carry handle, an external switching power supply with multiple regional plugs for use Internationally, and an Auxiliary input. You can even use the battery pack (sold separately) to make Blu portable. Also on board is a stereo headphone output, powered subwoofer output, and dedicated bass adjustment.

Blu features the same excellent sound as our other models with its two-way design and custom woofer, 30 WPC Class D digital amplifier, and ½" thick solid MDF cabinet, just like a real hi-fi loudspeaker.

Pair Blu with the Como Audio Bluetooth Turntable and the optional wired Right Channel Speaker and get a great stereo system without breaking the bank.

Blu is also available in an economic "utility" version, identical to the standard version except for its premium vinyl wrap instead of a real wood veneer or piano gloss paint finish.

There is certainly no lack of choice when it comes to Bluetooth speakers, but we think you'll find few are like Blu.
